

Project Scientist Media Kit

Thank you for your interest in Project Scientist. This media kit will provide you with key information and resources to help tell our story.

About Us

Project Scientist is an education nonprofit delivering high-quality experiences in science, technology, engineering, arts and math (STEAM) to underserved and marginalized girls* ages 4-18. We deliver summer and after-school programs in partnership with local schools, school districts, nonprofit organizations and STEM Companies. To date, we have served over 20,000 girls across the United States and Mexico.

You can learn more about our work at projectscientist.org/programs.

**While we focus on students who identify as girls, Project Scientist is dedicated to serving children of all gender identities and expressions.*
